EXTRUDED PROFILES FOR  
VARIOUS INDUSTRIES

MEMBER OF *Constantia* INDUSTRIES

 **ISOKON**  
INNOVATIVE PLASTICS SOLUTIONS

# KOPLAST

With the current production program, we have been present in the caravanning industry for more than 25 years. Thus, ensuring quality is not foreign to us. All processes are planned, executed and monitored.

In 2020, the company became part of the Isokon company within the Group Isosport GmbH, Eisenstadt, Austria and a member of CONSTANTIA Industries AG.

Since 1998, we have used statistical methods to control the intermediate phases of production, and we are continually changing key elements to ensure the stability of processes. The basis for our daily work is the satisfaction of the wishes and expectations of the customer with regard to the technical support and quality, which enables us the use of the most modern technology in combination with professional knowledge of the employees.

In doing so, we not only realize our pursuit of growth and development, but also the goals of our company's environment and the living space of our company.

The company with a small production of PVC profiles, was founded in 1971 and is today one of the largest in the field of consulting and manufacturing of technical plastic profiles for various industries.

The company's prevailing strategy is a good relationship with customers and technically innovative products, which meet the international standards ISO 9001, 14001, 45001.

---

# CARAVANING, JACHTING AND FURNITURE INDUSTRY

The company is for several years a supplier of PVC profiles for all major manufacturers in the caravaning industry for the markets of Slovenia, Germany, Austria, Italy and France. The ability of our own technological development and the execution of PVC profiles gives us a competitive position in the market.

## ROLLING DOORS

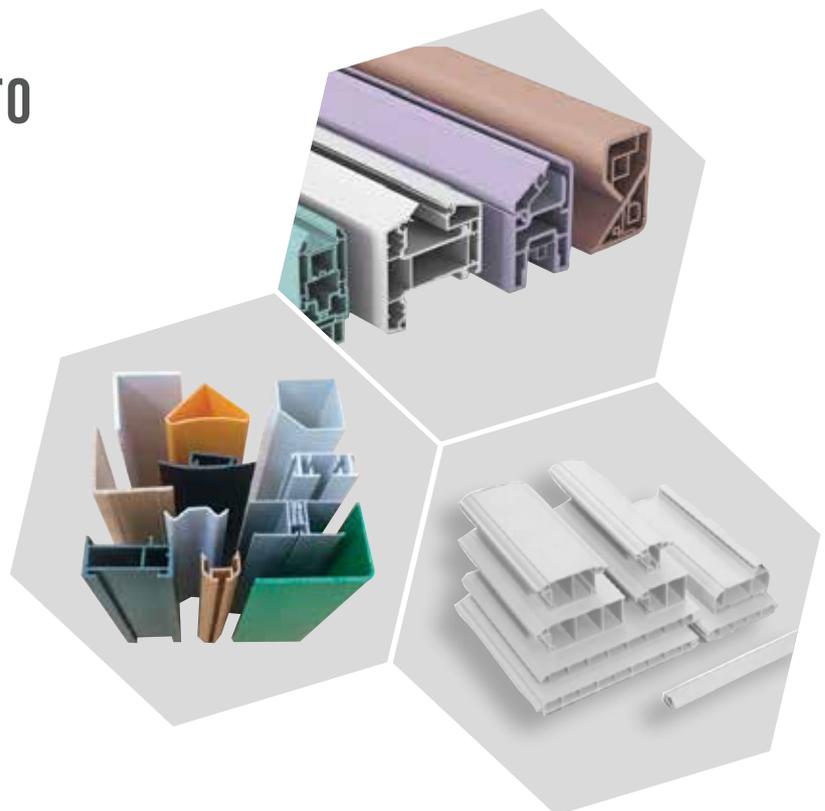

The shutter doors manufactured by the company Koplast are intended for use in the caravanning industry. They can be installed as sliding doors for closing drawers and cabinets, as well as bathroom doors.

They are made with special technology, in various colour shades, are silent during the drive and do not cause any noise.

They can be guided with top and bottom guides, or they can be guided through a channel in a thermoplastic shower cubicle.

## PROFILES ACCORDING TO MEASURE

With the help of our own development and technology department, we are able to design, construct and develop different profile types according to the requirements of our customers.

---

# COOLING TECHNOLOGY, ELECTRICAL INDUSTRY, CONSTRUCTION AND ADVERTISING

In the field of cooling technology, we produce a wide range of profiles for cooling units. Our main customers come from the Slovenian, German and Austrian market.

The company is for several years a supplier of PVC profiles for all major manufacturers in the caravaning industry for the markets of Slovenia, Germany, Austria, Italy and France. The ability of our own technological development and the execution of PVC profiles gives us a competitive position in the market.

With the help of our own development and technology department, we are able to design, construct and develop different profile types according to the requirements of our customers.

---

## PROFILES

On eight extrusion lines, we are able to produce profiles that weigh between 0,1 and 2,0 kg/m and can reach a maximum of 6m in length. The profiles can be produced open, without chambers, or closed with chambers.

Products could also be co-extruded and made from two or more different materials, for example soft and hard materials.

## EXTRUDE

For the extrusion of plastic materials, we have 8 production lines, which means that we can produce 7.2 million meters of profiles annually.

PVC ( hard soft), PA, PE, ABS, TPE, SMMA, PVC, ABS, PA, PP, HDPE

## LAMINATE

We can coat the profiles of different shapes with films of different quality, which are necessary for both indoor and outdoor use. With the paper, plastic and metal foils as well as micro foils, we achieve an effect of wood, marble, metal design and other designs.

## WELD

Would you like us to link your profiles into a framework? We can offer that too. We can weld them together with the help of different connecting elements, screws, ...

## BEND

Our equipment allows us to turn different profiles according to your wishes. The minimum radius of the curvature is 30 cm (depending also on the profile shape) and combinations of different curvatures or curvatures and straight parts are also possible.

## CNC

With the latest CNC machine, we can also process profiles and adapt them to your requirements, such as openings for the installation of luminaires or the like.
